

1.- Introduction Of all the precious metals, gold is the most popular as an investment. Investors generally buy gold as a way of diversifying risks, especially through the use of futures, contracts and derivatives. The gold market is subject to speculation and volatility as are other markets. Compared to other precious metals used for investment, gold has the most effective, safe haven and hedging properties across a number of countries. Gold's versatility increases its value as it can be shaped into gold bars, coins, jewelry and other items small enough to put in your pocket. Much of the value of gold comes from its scarcity, but mostly from the metal's usefulness to industries. Like gold, Cryptocurrency in the form of a Token is valuable, scarce and diverse. As a digital coin it is easily and effortlessly transmitted, creating a distributed, decentralized Blockchain that aids business. Cryptocurrency also adds value by making the transactions of your money fast, secure, and transparent.

2.1- Problem Gold is the only asset that has never disappointed in over 5,000 years of history. As such, it is a completely stable and profitable investment. In crisis, it is the safest investment with the greatest potential to increase in value. The World's biggest economies, China and India, are buying up gold with a growing demand. Also, for the first time in 30 years Central Banks have begun to expand their reserves of gold. As a material, gold has application in smart phones, microprocessors, memory chips in computers, etc. Latest reports confirm an oncoming demand of gold as material for application in the healthcare and aerospace industry due to its characteristics of no rust, the ability to be easily alloyed with other metals, and is basically indestructible. The gold space faces a type of impasse despite its reliability. Developing a gold mining project with a goal to launch production is very ineffective due to archaic funding methods used from the banks currently. Such a situation causes several challenges to developers with promising projects and interested investors. First, banks prioritize the financial giants. Banks charge elevated fees when introducing the gold mining investment opportunity. So, the main problem for interested investors, worldwide, is that investing in gold mining is very exclusive and complex due to its current entry ecosystem.

2.2 - Solution With UBC, we unlock the gold mining potential. So, the era of irritating bureaucracy, abundant paperwork, budget discrimination, and time-consuming practices is finally history. You Bet Mining offers the Ubetcoin, which value will reflect a generated profit of the company over time, at the discount rate, as an option available to anyone worldwide to invest into exploitation of the gold deposits by eliminating intermediary costs, formal barriers, technical obstacles, and personal disclosure. Ubetcoin solves the problem with the Ethereum based Blockchain project,

---

geared towards creating a modern platform which consists of developers and investors aiming to realize the gold mining projects together.

2.3- Our Mine: The You Bet Mine in Nevada County, California The You Bet Mine is a resource with over 133 million cubic yards of ore with a conservative estimated gold resource potential of between \$ 2.41 and 4.21 billion. Which is noted for rich veins of gold and silver, as well as the base metal suites of copper, lead and zinc. The You Bet Mine strategically claims the mineral rights of historic and modern-day workings of several areas, including the famous Gold Bug Mine located on our Full House claim block. While several high-grade veins are claimed, the short-term prize on this claim group is an ore stockpile totaling approximately 133 cubic yards of ore. A laboratory determined the average of four submitted samples indicated an average of 0.218 ounces-per-ton. Our Project We represent the first to market a gold mining project which is financed through Blockchain optimization for the exploitation of the gold mine.

3.1- Aims and Objectives The main aim of the project is to realize, on progress basis, our first gold mining project located in Nevada County by utilizing features of the Ethereum Blockchain platform. This will be accomplished with creation and issuance of the Ubetcoin cryptocurrency at a discounted value prior to gold production. The project plans to ensure a sustainable organic growth by simultaneously conducting exploitation of the existing gold deposits, steadily expanding the production capacities over time and developing new perspective gold properties for exploitation under the critical expertise of our team. Our vision is to create a Blockchain platform which will facilitate fundraising for all junior gold mining projects worldwide. Ubetcoin builds a community of investors committed to take part in crowdfunding in order to develop and exploit gold properties with minimum risk and amount involved.

### 3.2- Project Objectives

1. Purchase and installation of the gold mining plant and necessary equipment.
2. Mining and sale of the gold produced from the deposit and identifying, developing and exploiting new perspective gold deposits worldwide.
3. Helping local community to develop, eliminate poverty by means of charity, establish basis for creation of fundraising platform for gold mining companies.

3.1 Helping our Veterans, their Spouses, their Widows and families all over the World a non Government guarantee platform like Ubet Club / Ubetcoin a mean to secure a place to stay. Ubet Club / Ubetcoin goal is to help reduce poverty and homelessness among Veterans and Humanity in general, one family at a time.

---

3.2 Our World is so rich with resources and our Veterans who sacrificed their life to make sure that we are safe and when they come home injured, they don't have a home to stay with their family.

**3.3 - Location** The You Bet mine is located T.15N, R.10E; T.16N, R.9E; T.16N, R.10E in Nevada County, California. It is located within the Red Dog Mining district, which is noted for rich veins of gold and silver, as well as the base metal suites of copper, lead and zinc.

3.4 Exploiting the Mine Since You Bet Mine closure, exploration has been focused on the gold. It is the professional opinion of the Geologist making the evaluation that the You Bet Mine is a rich, high grade, poly-metallic deposit that within the report it stated that these five properties contained a substantial economic mineral resource with over 133 million cubic yards of ore with a conservative estimated gold resource of between \$ 3.04 and \$ 5.32 billion (\$ 1,600/oz gold).

4. Project Execution - Optimization of Blockchain in the project - Blockchain technology, especially Ethereum, provides more possibilities for start-ups and investors to obtain funding and invest without intermediaries, anonymous and absolutely transparent. The main mission of You Bet Mine is creating for everyone, everywhere, anytime access to invest in Ubetcoin. For that reason, we have launched Ubetcoin on Ethereum Blockchain. Realization of this option with Blockchain not only allows attracting investment to the project, but also, makes subject to unique features of Smart Contract, facilitates buyback of tokens, and integrates tokens on crypto exchanges. For all the aforementioned, Ubetcoin fulfill all necessary technical requirements.

4.1 Main Characteristics of Ubetcoin: Standard of ERC-20, enables listings on crypto exchanges. Limits amount of issued tokens for the project to 1,000,000.000 Ubetcoin.

4.2 The Stages In order to enable maximum transparency of funds usage and minimize the risks associated with volatility of cryptocurrencies, the Ubet Club project will issue its tokens by means of Smart Contract. The funds collected from the sale of tokens will be immediately invested in gold mine construction according to the plan.

#### 4.3 Token Distribution

70% offering for investors

15% for team and development

10% Bounty rewards

5% Legal team

---

5. Project financial Plan An estimated: \$ 100,000,000.00 is needed for equipment and facilities.
